PROFESSIONAL SUMMARY

Detail-oriented Frontend Developer with a foundation in modern JavaScript, React.js, and React Native. Experienced in building full-stack, responsive web applications through academic projects and hands-on learning. Proven ability to collaborate in team settings, troubleshoot complex issues, and translate user needs into functional and engaging UI. Seeking to apply technical skills and a user-focused approach to build scalable web and mobile applications.

TECHNICAL SKILLS

Frontend: JavaScript, React.js, React Native, HTML5, CSS3, Bootstrap

Backend & Databases: Node.js, REST APIs, Java, MongoDB, SQL

Tools: Git, Docker, VS Code, Figma, Tableau

EDUCATION

Bachelor of Science in Informatics | University of Washington - Seattle

June 2025

PROJECTS

Queen Caphe Website | *Freelance Website Designer*

May 2025 – Jul 2025

- Developed a custom, responsive WordPress website using modern page builders, focusing on optimal user experience and mobile performance.
- Implemented and configured e-commerce plugins for online ordering functionality.
- Troubleshoot and resolved front-end performance issues, ensuring cross-browser compatibility

Level Up Learning | *Frontend Developer & UX Designer*

Jan 2025 – Jun 2025

A gamified full-stack web application to improve reading comprehension for middle school students.

- Engineered the front-end of a responsive web app using React.js, JavaScript, HTML5, and CSS3, deployed on Vercel.
- Implemented user authentication and managed application state to create dynamic, interactive UI elements.
- Led user-centered design processes, from wireframing to prototyping in Figma, ensuring an engaging user experience.

Recipeasy | *Backend Developer & UX Designer*

Mar 2025 – Jun 2025

A web application to help users minimize food waste by finding, sharing, and saving recipes.

- Developed a Javascript front-end integrated with a MongoDB database to manage user data and recipes.
- Implemented secure user authentication via Azure AD and created personalized user experiences with private cookbooks.
- Designed and built RESTful API endpoints (GET/POST) with features for ingredient-based search, allergen filtering, and public/private recipe sharing.

WORK EXPERIENCE

Undergraduate Teaching Assistant

Seattle, WA

University of Washington iSchool

Mar 2025 – Jun 2025

- Led weekly lab sections for 35+ students, instructing on advanced SQL querying and relational data modeling concepts.
- Debugged complex student SQL code and provided constructive feedback during assignment grading, strengthening problem-solving skills and code accuracy.
- Held office hours to provide one-on-one technical support, clarifying database concepts and improving student comprehension and success rates.

Product Specialist

Bellevue, WA

Apple

July 2024 – Jan 2025

- Communicated technical concepts to non-technical users, honing cross-functional communication and user-centered problem-solving.
- Resolved software issues and facilitated device setup, improving customer satisfaction through hands-on troubleshooting.
