EDUCATION

Bachelor of Science in Informatics | University of Washington - Seattle

June 2025c

Software Development

PROJECTS

DawgRide

Dec 2024 – Mar 2025

Software Developer

- Developed a mobile app with Expo using React Native Maps to enhance campus shuttle accessibility and navigation.
- Collaborated with stakeholders, conducting user research to address pain points in UW's existing NightRide and SafeTrip services.
- Practiced Agile development through weekly sprints and team meetings, iteratively releasing features based on user testing and feedback.

Smiski Grove

Sep 2024 – Dec 2024

Software Developer

- Built a full-stack gamified web app with HTML, CSS, JavaScript, React.js and Firebase, implementing user authentication, data storage, and interactive UI elements.
- Led user-centered design efforts, from wireframing to prototyping, to improve engagement and usability for figurine collectors.

WORK EXPERIENCE

Undergraduate Teaching Assistant

Seattle, WA

University of Washington iSchool

Mar 2025 – Current

- Lead weekly lab sections for 35+ students on advanced querying with MySQL and relational data modeling, reinforcing technical concepts through hands-on instruction.
- Grade assignments and debug student code, offering clear, constructive feedback.
- Held office hours, providing 1:1 support, improving student understanding and assignment success rates.

Product Specialist

Bellevue, WA

Apple

July 2024 – Jan 2025

- Communicated technical concepts to non-technical users, honing cross-functional communication and user-centered problem-solving.
- Resolved software issues and facilitated device setup, improving customer satisfaction through hands-on troubleshooting.

Hostess & Server

Bellevue, WA

Supreme Dumplings

May 2023 - Sep 2024

- Optimized seating via a digital reservation platform (Yelp) for 20–50 daily reservations, contributing to data-driven decision-making around staffing and layout.
- Served and coordinated meals for an 8-table section, maintaining accurate order delivery in collaboration with kitchen staff.

Post-Liver Transplant Student Assistant

Seattle, WA

UW Medical Center

Feb 2022 – May 2023

- Entered lab data for 100+ patients in Epic for physician review, and coordinated with 15+ external labs to track and input pending results, ensuring data completeness and timeliness.
- Managed immunosuppression review reports, following up with 10+ patients daily regarding overdue labs and protocol adherence, supporting treatment compliance.
- Educate patients on lab protocols and dose change procedures, effectively conveying physician's results notes and providing guidance on scheduling future bloodwork.
