Bachelor of Science in Informatics | University of Washington - Seattle

June 2025

Software Development

PROJECTS

Level Up Learning

Jan 2025 – Jun 2025

UX Designer & Frontend Developer

- Capstone project building a full-stack gamified web app with HTML, CSS, JavaScript, React.js and Vercel, implementing user authentication, data storage, and interactive UI elements.
- Led user-centered design efforts, from wireframing to prototyping, to improve reading comprehension and engagement for middle schoolers in the Seattle area.

Recipeasy

Mar 2025 – Jun 2025

UX Designer & Backend Developer

- Developed a web application using React.js and MongoDB to help users minimize their personal food waste by allowing them to easily find, share, and save recipes.
- Implemented user authentication via Azure AD, enabling secure account creation, login, and personalized cookbook management.
- Designed RESTful API endpoints (GET/POST) to fetch, filter, and add recipes, with features for ingredient-based search, allergen exclusion, and public/private recipe sharing.

DawgRide

Dec 2024 – Mar 2025

Software Developer

- Developed a mobile app with Expo using React Native Maps to enhance campus shuttle accessibility and navigation.
- Collaborated with stakeholders, conducting user research to address pain points in UW's existing NightRide and SafeTrip services.
- Practiced Agile development through weekly sprints and team meetings, iteratively releasing features based on user testing and feedback.

WORK EXPERIENCE

Website Designer

Seattle, WA

Queen Caphe

May 2025 – Current

- Design and build custom WordPress website using Elementor and Divi page builders, ensuring website is visually appealing, responsive, and optimized for performance.
- Implement and manage plugins for online ordering, ensuring site security and functionality.
- Troubleshoot WordPress issues, including performance optimization and bug fixes.

Undergraduate Teaching Assistant

Seattle, WA

University of Washington iSchool

Mar 2025 – Jun 2025

- Lead weekly lab sections for 35+ students on advanced querying with MySQL and relational data modeling, reinforcing technical concepts through hands-on instruction.
- Grade assignments and debug student code, offering clear, constructive feedback.
- Held office hours, providing 1:1 support, improving student understanding and assignment success rates.

Product Specialist

Bellevue, WA

Apple

July 2024 – Jan 2025

- Communicated technical concepts to non-technical users, honing cross-functional communication and user-centered problem-solving.
- Resolved software issues and facilitated device setup, improving customer satisfaction through hands-on troubleshooting.
